Week 9 goals

Cli

- need to start connecting to other dbs
- need a local state for a build
- STRETCH GOAL: get multiple fallbacks workings for when different services are down

Redis

- Need to import soome minimal armor info for offline build making
- Finish up the search calls on items/decorations and whatnot

Neo4j

- need to hook up to insert calls in kafka
- write build generator query

Cassandra

- Add more queries to the driver, finish up what is needed for cli calls

Lab

- Finish it

Kafka

- finish connecting kafka so that all writes go through kafka
- ensure remote connections work for producers (not too worried on this)
